Summary/Abstract: The work contains an analysis of security culture phenomenon from the perspective of Sun Tzu. The idea here is to build the entire universe and a placed-in man, as an area in which operate the impact from the energy of macrocosm. It is the same – corresponding to the body of the universe – with microcosm – the body of a human being immersed in the interaction energy of the endless universe. This concept, combining with the ideas of Confucianism and Buddhism, which here are not broadly discussed, has practical application for over two thousand years in the deliberations on the various areas of human activity. The most important characteristic of the Eastern world view - one could almost say the essence of it - is the awareness of the unity and mutual interrelation of all things and events, the experience of all phenomena in the world as manifestations of a basic oneness. (Fritjof Capra,The Tao of Physics). The fundamental element of the cosmos is Space. Space is the all-embracing principle of higher unity. O Brahmana, it is just like a mountain river, flowing far and swift, taking everything along with it; there is no moment, no instant, no second when it stops flowing, but it goes on flowing and continuing. So Brahmana, is human life, like a mountain river. (Buddha). Awaken Healing Energy Through the Tao The Taoist Secret of Circulating Internal Power. Printed in the United States of America. XCII. When he was in his twenties, Master Chia studied with Master Meugi in Singapore, who taught him Kundalini Yoga and the Bud-dhist Palm. With the Buddhist Palm, he was soon able to eliminate blockages of flow of life-force in his internal organs and to drive cold, wet or sick energy out of patients who came to see his Master, thereby restoring them to health. The far reaching implications of the sexual revolution of the 1960's, including the various liberation movements that have ac-companied it, are now being re-examined in the wake of wide-spread conflict and unhappiness between men and women.
