Stylishly versatile, rugs offer an easy way to add color and plush comfort to any room in your home. We offer rugs in every size, from smaller carpet squares to huge area rugs that span the entire room. Find round, square, rectangular and elbow-shaped rugs in practically any color and pattern imaginable. Whether you choose a stylish rug featuring graphic designs and colorful imagery or a more traditional design for a classic look, maximize your room's potential with a beautiful rug.

### How to Choose a Rug

Perfect for large homes and cozy apartments alike, rugs serve as both fundamental pieces and focal points of any space. Large area rugs create a canvas for the entire room, while smaller rugs draw the eye to specific areas. In a large room, perfectly placed area rugs can help define the space, creating smaller sitting areas within the room.

Bare hardwood floors can always benefit from the addition of a warm, plush rug, but carpeted rooms can also benefit from rugs, which add contrasting textures and patterns. Get creative by hanging elegant rugs on walls or layering rugs to mix and match different tones and textures. Ultimately, rugs offer a versatile way to enhance your home's decor and give your room a finished look.

### Size, Budget & Style

Shop fashionable rugs available in a range of prices and sizes to fit any space or budget. In larger spaces, area rugs can brighten the room or define the space. Placing a rug underneath a coffee table in a small room adds a touch of style and color without sacrificing additional space. While rugs vary extensively in cost, we offer rugs in every price range to ensure you’ll find one that matches your budget.

Rug shapes range from square or rectangular to circular or oval. Many people place rugs under tables, dining sets or other large furniture pieces, making choosing the perfect size essential. To ensure your rug will fit your décor perfectly, pick out a rug and...
Choosing the Color & Pattern of your Rug

A great rug commands attention as soon as you enter the room. A carefully selected rug can add a pop of color to an otherwise dull space or offer a subdued balance to a room decorated with vibrant hues and patterns. Try matching accent pieces, like throw pillows and curtains, to your rug to really accentuate any color scheme.

Successful decorating is all about balance. If your room already features big, bold patterns, choose rugs with subdued patterns or textures. On the other hand, a rug featuring a unique pattern or vibrant color can brighten up a room that otherwise features fairly neutral or solid furniture colors. For example, dining rooms are a great place for patterns. As dining furniture is often subdued, a skillfully place patterned rug can bring the room to life.

Fabrics & Materials

Quality rug fabrics are durable and plush with a luxurious appearance. Long-lasting and soft materials include wool, silk and cotton. While rugs in these materials are higher in cost, they can handle more use. In contrast, synthetic fibers are a great choice when decorating on a budget. Synthetic materials are designed to look just like expensive fabrics, however, rugs made of these materials will not likely last as long. If shopping for thicker materials that add appealing texture to a room, choose a stylish shag rug for your space.
Unless you find information about the author to the contrary, such blogs and sites should not automatically be considered to have as much authority as content that is officially part of the university's site. Or you may find that the author has a good academic reputation and is using their blog or website to share resources he or she authored and even published elsewhere. That would nudge him or her toward the Schools neighborhood. Listed below are sources to use to look for what the organization or individual may have published and what has been published about them. Tip: Find Out What the Author (Person or Organization) Has Published. Library Catalogs – Search in a large library catalog to find books written by the author. HubSpot uses the information you provide to us to contact you about our relevant content, products, and services. You may unsubscribe from these communications at any time. It's about your reader, and what that person is looking to learn or gain from your article. It helps to think of this setup as a well-composed sentence -- you're the object, and the reader is the subject. That concept can be a bit confusing without context, so have a look at how Matt Southern pulled that off below: Source: Search Engine Journal. You've probably come across the occasional author bio that features a personal tidbit thrown in, like "cat lover" or "coffee addict." But when is that okay or smart -- or even more important, appropriate? “Author bias” means that the author feels strongly about the topic one way or another, which prevents the author from taking a neutral approach to presenting findings. For print sources, you can assess bias by considering the publisher of the book. Books published by a university press undergo significant editing and review to increase their validity and accuracy. However, scholarly journals tend to be peer-reviewed and contain citations of sources, whereas a magazine article may contain information without providing any sources to substantiate purported claims. While you want to support your argument with your research, you don't want to do so at the expense of accuracy or validity.
