**ABSTRACT:** This article provides a content and citation analysis of 186 articles published in the *Journal of Management Accounting Research* (*JMAR*) between 1989 and 2008. We first examine *JMAR*'s national and international presence. Then an analysis of *JMAR* is structured by a taxonomy used by Hesford et al. (2007) to classify the articles into content, source disciplines, research methods, and contributors. Articles and citations in *JMAR* are analyzed and the most-cited authors, articles, journals, and books are presented. The extent to which *JMAR* authors are cited in leading non-management accounting journals is also presented. Finally, authorships and editorial contributions by international faculty are compiled and discussed.
