In the industrial areas dominated by mechanical operations, the methods of Industrial Engineering (hereinafter referred to as the "IE") have been developing since 1990s (Maynard, Zandin, 2005). Through their implementation, companies can achieve more efficient utilization of their resources without the need of additional investments, which results in cost reduction. (1) Cycle Time (CT) is the time for each line operator to carry out their production operation. Industrial Engineers most often cite Maynard's and Salvendy's handbooks, both last updated in 2001. The most recent English-language handbook I know of is Badiru's, whose 2nd edition came out in 2013. NITech is the Nagoya Institute of Technology (Nagoya Institute of Technology). Since 2007 NITech has been running a 6-month Plant Manager Training School (Nagoya Institute of Technology) program once a year, including lectures, plant visits, and projects. This program has a companion handbook last updated in 2015. It's focused on plant managers rather than IE's but I included it here because it represents a different approach. The most recent
