PRACTICAL HANDBOOK OF INDUSTRIAL TRAFFIC MANAGEMENT

The fifth edition of this reference book, like its predecessors, is arranged for the practicing traffic man, for the businessman who must make decisions involving transportation and physical distribution and for the student interested in a career in transportation. The problems of economical and adequate distribution and transportation are all treated. The authors have made every effort to cover all the principal responsibilities and functions of industrial traffic management. Because rates and services are subject to frequent change, such information is discussed only in basic or general terms. There are chapters on government regulation and on the transportation of hazardous materials.

Corporate Authors:

Traffic Service Corporation
815 Washington Building
Washington, DC United States 20005

Authors:

COLTON, R C
Ward, E S

Publication Date: 1973

Start by marking "Practical Handbook of Industrial Traffic Management" as Want to Read: Want to Read saving... Want to Read. Let us know what's wrong with this preview of Practical Handbook of Industrial Traffic Management by Leon Morse. Problem: It's the wrong book It's the wrong edition Other. An edition of Practical handbook of industrial traffic management (1980). Practical handbook of industrial traffic management. 6th ed. by Leon William Morse. This edition published in 1980 by Traffic Service Corp. in Washington. Written in English. — 532 pages. This Temporary Traffic Management Handbook provides guidance for traffic management designers and work promoters on how to make roadworks safer. It will not only make our roads safer for vulnerable road users — people who walk, cycle and ride motorcycles — but will also help to unlock the barriers to active travel faced by people who are visually impaired, or who use wheelchairs and other mobility aids. • Practical - providing realistic ways of enabling movement that minimise disruption for people. • Legible - being easily understood and unambiguous for all users. Designers and contractors should seek to re-provide facilities such as walkways or dedicated cycling

facilities during roadworks to maintain routes with minimal disruption.
