Date: 2018-06

Abstract:

The 2nd International Women in Science Without Borders (WISWB) Indaba brings the WISWB series from the north of the African continent where the inaugural chapter was held in Egypt in 2017, to the very south of the African continent, Johannesburg, in 2018. The WISWB conference series is strategic and topical in that it aims to highlight and emphasise the contribution of women researchers within the science, technology, engineering and mathematics (STEM) ecosystem to effect positive outcomes. Is this important to continuously explore why and how women STEM researchers are an indispensable asset, and to understand the values and richness they bring to a research environment. WISWBIndaba is a gender-inclusive conference as researchers more often than not work in a multi-gender workplace. The overarching theme of our conference in 2018 is: "Resilience in Diversity".

The Science Without Borders@ Challenge is an international contest that engages students and teachers in ocean conservation through art. This annual competition inspires students to be creative while promoting public awareness of the need to preserve, protect, and restore the world's oceans and aquatic resources, contributing to the overarching goals of the Khaled bin Sultan Living Oceans Foundation. The Challenge is open to primary and secondary school students 11-19 years old, with scholarships of up to \$500 awarded to the winning entries. The 2021 Science Without Borders@ Challenge.
