### About NADLE

The National Academic Digital Library of Ethiopia (NADLE) is a project under Ministry of Science and Higher Education, Ethiopia. The objective is to collect and collate metadata and provide full text index from several national and international digital libraries, as well as other relevant sources. It is a academic digital repository containing textbooks, articles, audio books, lectures, simulations, fiction and all other kinds of learning media. The NADLE provides free of cost access to many academic books in English and the Other languages.

- ENZYMOLOGIA "The Methods in Enzymology series represents the gold-standard." - NEUROSCIENCE. Most recent volume. Ion Channels Part C, volume 653 in the Methods in Enzymology series, highlights new advances in the field with this new volume presenting interesting chapters. Each chapter is written by an international board of authors. Info/Buy. methods in enzymology. 993 Pages · 2014 · 24 MB · 2,040 Downloads· English. enzymology. Preview. Download. Introduction to Methods of Applied Mathematics or Advanced Mathematical Methods for Scientists Methods in Enzymology. Single Molecule Tools, Part B: Super-Resolution, Particle Tracking, Multiparameter, and Force Based Methods. 695 Pages·2016·28.26 MB·293 Downloads·New! Academic Press, 2010. - 695 p. - Methods in Enzymology, Volume475. - Single molecule tools have methods in enzymology. Volume LIV. Biomembranes (Part E: Biological Oxidations) Edited by Sidney Fleischer and Lester Packer. methods in enzymology. Volume 159. Initiation and Termination of Cyclic Nucleotide Action Edited by Jackie D. Corbin and Roger A. Johnson. Methods in Enzymology (METHOD ENZYMOL). Publisher: Elsevier. Journal description. The critically acclaimed laboratory standard for more than forty years, Methods in Enzymology is one of the most highly respected publications in the field of biochemistry. Since 1955, each volume has been eagerly awaited, frequently consulted, and praised by researchers and reviewers alike. Methods in Enzymology is a series of scientific publications focused primarily on research methods in biochemistry by Academic Press, created by Sidney P. Colowick and Nathan O. Kaplan, now part of Elsevier. Historically, each volume has centered on a specific topic of biochemistry, such as DNA repair, yeast genetics, or the biology of nitric oxide. In recent years, however, the range of topics covered has broadened to also include biotechnology-oriented areas of research.
