Levin, S. J. (2014). Experiments in Cuir Bouilli: Practical Trials of Medieval Leathercraft. Retrieved from <https://doi.org/10.14418/wes01.1.1079>

This thesis pursues an experimental investigation of cuir bouilli, a particular form of hardened leather used as armor in medieval Europe. In this exploration, I have produced a sample group of 30 distinct varieties of cuir bouilli. These samples represent the most commonly theorized and scientifically grounded production methods of this historic medium. Using a series of armor specific tests, broadly encapsulating the abuse of arrow fire, blunt force trauma, and slashing, I have measured the performance of each cuir bouilli sample. The data gathered from these tests can be used to infer physical properties about each sample, revealing the essential

effects of each hardening method. Moreover, these tests indicate how cuir bouilli might have functioned in actual armor use. They demonstrate strengths and weaknesses of each variety, offering reasons for their eventual abandonment in certain contexts and the roles they might have continued to play in others.

Forgot account? or. a new piece i'm making this has to have a beaten up effect to it so what you are seeing is wet leather beaten against concrete with a hammer from the flesh side the pattern has been cut in with a stanly knife. Cuir-bouilli, and general leathercraft cheats added 20 new photos to the album: Raised Deer skull. April 17 . my first attempt at creating this look ,, it's better explained in my human Skull lbum how it was made. Raised Deer skull. 20 Photos. Cuir-bouilli, and general leathercraft cheats added 36 new photos to the album: making of a skull orc belt. April 17 . Cuir bouilli (or boiled leather) was rigid leather hardened by saturation in water or boiled in wax. Once boiled it could be stamped or molded into a definite form when in that condition. Upon drying it became intensely hard and tough but more brittle. From there it would usually be cut into scales or plates and fashioned into various armor pieces.
