Ten years after the 2008 financial crash comes economist Adam Tooze’s compelling analysis of what really happened, and where we stand now. Storm clouds gather over the financial district of London’s Canary Wharf in 2008. Photograph: Matt Cardy/Getty Images. Storm clouds gather over the financial district of London’s Canary Wharf in 2008. All Fall Down book. Read reviews from world’s largest community for readers. All Fall Down traces the ways in which changes in financial structure and regulation eroded monetary control and led to historically high levels of debt relative to GDP in both developed and emerging economies. Published August 31st 2018 by Edward Elgar Publishing. More Details ISBN. The crisis reduced consumer wealth in the region of trillions and sparked off a series of recessions in both the developed and developing world. In this essay we will look at the causes, evaluate the measures taken to contain it and examine some of the underlying discourses that plied the timeline of the recession. The subprime mortgage crisis Easy credit conditions in the United States led by steadily decreasing interest rates and an influx of foreign funds created a housing bubble, which was financed by a large number of subprime mortgages. These were easy to obtain and put home purchasing p
