Description:

HANDBOOK OF INFORMATICS FOR NURSES & HEALTHCARE PROFESSIONALS, 5/e is a complete and up-to-date overview of the key issues related to adoption and use of health information technology and nursing informatics, with detailed practical information to support students and professionals in the field. Intended to address all the concepts, skills, and tasks professionals need to achieve the nation's healthcare information technology goals, it contains three major sections: General Computer

Information, Health Care Information Systems, and Specialty Applications. Major themes of privacy, confidentiality, and information security are woven throughout; project management is introduced in the context of strategic planning, and addressed in many other chapters. This edition contains extensive new coverage throughout, along with eight new chapters addressing issues such as Personal Health Records (PHRs), Health Information Exchanges (HIEs), usability, and consumer education.

Book was done well enough and covered all the topics clearly. It was a dry topic to some degree and the text didnâ€™t do much to change that. I bought this book because it was required for one of my nursing classes. The book was in very good condition when it arrived. The content of the book is much to be desired. It was very dry and did not keep my attention. The topic of the book is, however, a difficult one to make sound 'fun' and unfortunately, this book did not capture it either. Read more. T. Lohman.Â Good general information regarding health informatics although it is not the fifth edition, only the fourth. Bought it good used and it was all of that and more! Only paid 95 cents plus shipping for it, which was an excellent find! Thanks The opportunities in nursing informatics include all specialties in acute care, home health, ambulatory care, long-term care, outpatient settings, telehealth, software development, and redesign of work flows. The HIMSS made recommendations for nursing informatics based on the IOM report. These suggestions include involvement in leadership, education, and practice for nursing. Â Leadership: With leadership, HIMSS proposes partnership with nurse executives to lead technological changes that promote health and healthcare delivery, support the development of informatics departments, and foster the Nursing informatics is a challenging and exciting specialty combining your love of and experience in nursing with your aptitude for technology. IT applications in health care settings are growing by the day, and so is the demand for nurses to work in this field. In a recent survey, the Healthcare Information and Management Systems Society (HIMSS) found that 95% of the respondents "view health IT as a strategically critical tool to help healthcare organizations be successful."
