Keywords: Islam, Medical Ethics, Definition of Life, Terminal Illness, Euthanasia, Living Will, Advanced Directives, Organ Donation, Transplantation, Assisted Reproductive Technologies, Surrogacy, Contraception, Sterilization, Abortion, Genetic Engineering

Abstract

Muslim Physicians, Ethicists, Imams and scholars are asked questions by Muslim and non-Muslim patients, physicians and institutions as to what is Islam's position or opinion on certain medical dilemmas affecting the care and outcome of patients' illness and life. Thus, IMANA decided to make a position paper, "The IMANA Perspective", to provide to those who seek our opinion and enable them to pursue further reading on their own.

Start by marking "Medical Ethics: An Islamic Perspective" as Want to Read: Want to Read saving... Want to Read. Islamic bioethics, or Islamic medical ethics, (Arabic: الأخلاق الطبية al-akhlaq al-tibbiyyah) refers to Islamic guidance on ethical or moral issues relating to medical and scientific fields, in particular, those dealing with human life. In Islam, human life is regarded as an invaluable gift from God, and should therefore be both respected and protected. This is evident in many Qur'anic verses or ayat, one of the most important being IMANA Ethics Committee Islamic Medical Association of North America. DOI: <https://doi.org/10.5915/37-1-5528>.
